

Comprehensive Mobility Solution

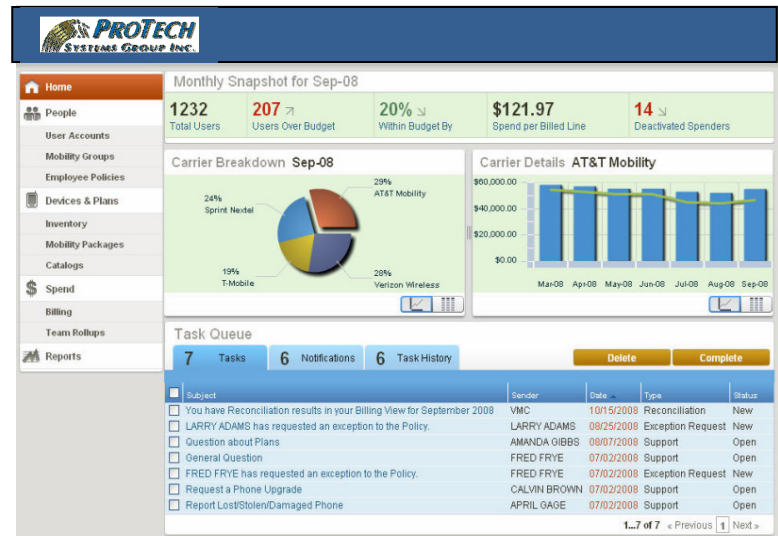

ProTech's mobility solution does not compete with the major carriers. (AT&T, Verizon, Sprint-Nextel and T-Mobile)

We offer services that are beyond the scope of any of the major carriers in the United States, our solution was developed as a **Complete Wireless Solution** to encompass our client's total need for supporting corporate wireless devices.

ProTech offers a solution—proving every day that a new category of mobile devices require a comprehensive solution that can help maintain employee productivity and lower overall costs. Our comprehensive management solution offer benefits designed to improve security practices, greater worker retention, reduced downtime and more hassle-free issue resolution.

ProTech's research reveals that wireless services and devices cost nearly ten times more to manage than their wireline counterparts. By consolidating to a single repository platform, IT can better stay on top of mobility costs and reduce unnecessary spending.

ProTech offers a mobility solution that includes every aspect of managing a wireless device; our management services provide our client's with cost-effective tools in comprehensive mobility management, procurement, and deployment.

Mobile devices are becoming mission critical for most employees, while enterprise mobility management has become increasingly complex and frustrating for employers.

ProTech's "1 Solution for Everything Mobile" is an on-demand solution that provides a comprehensive view of all your mobile devices and services through an integrated portal that allows collaborative workflow utilizing an informative dashboard.

ProTech's "1 Solution for Everything Mobile" solution provides a unique people-centric approach that enables management complete visibility and control of their mobile workforce, inventory, policy, and spend management.
