

Instant Recovery on Demand

Instant, Uninterrupted Recovery Services

Can you be sure of having access to the critical applications and data you need to keep your business running after a system failure, unplanned outage or disaster? With Instant Recovery on Demand, you can.

A highly sophisticated and powerful business-continuity and disaster-recovery (BC/DR) service, Instant Recovery on Demand offers secure, real-time, WAN-optimized continuous replication from your primary servers to “standby” servers at our remote, secure top-tier data center. In the event of a failure, Instant Recovery on Demand automatically redirects your workers to our remote site for seamless continuity of operations.

Multiple Platforms Supported

This service supports Microsoft Windows Server, Exchange Server, SQL Server and IIS Web server, as well as Oracle, BlackBerry and other 32-bit and 64-bit Windows applications.

Whether your applications are running on physical servers or virtual servers such as VMware, Microsoft Hyper-V, Virtual Iron or Citrix XenServer, our instant recovery service will ensure your business continues without disruption.

Service Features

- Real-time data replication ensures access to the most up-to-date information.
- Scheduled and automated failover redirects employees to failover system with little to no impact.
- Automated, non-disruptive disaster recovery testing ensures failover systems and applications are available for use without disrupting the production or disaster recovery environments.
- Remote, non-disruptive deployment keeps your business going during deployment process.

Key Benefits: A Completely Integrated Turn-Key Solution

- The solution delivers:
 - Protection for both physical and virtual servers
 - VMware, Hyper-V, XenServer and Virtual Iron
 - All software licensing required for data center and site location
 - All data center hardware
 - All bandwidth costs at data center
 - All setup costs at data center
 - All monitoring and 24/7 support costs at data center
 - The ability to run for 5 business days from the data center with no additional cost
 - Remote access for an unlimited number of users to the hot-site when the primary environment has failed
 - Complete statistical reporting on data transferred and failover status

Instant Recovery on Demand can be deployed in less than 24 hours with no hardware or software purchase requirements.

Contact ProTech today, and your business could be safe from disaster by tomorrow.
