

Microsoft SharePoint

ProTech Systems Group offers a Microsoft Certified SharePoint specialist to guide you through the process of successfully implementing Microsoft Office SharePoint Server 2007 in your environment.

Top 10 benefits of using SharePoint:

1. Provide a simple, familiar, and consistent user experience.
2. Boost employee productivity by simplifying everyday business activities.
3. Help meet regulatory requirements through comprehensive control over content.
4. Effectively manage and repurpose content to gain increased business value.
5. Simplify organization-wide access to both structured and unstructured information across disparate systems.
6. Connect people with information and expertise.
7. Accelerate shared business processes across organizational boundaries.
8. Share business data without divulging sensitive information.
9. Enable people to make better-informed decisions by presenting business-critical information in one central location.
10. Provide a single, integrated platform to manage intranet, extranet, and Internet applications across the enterprise.

Our proven project management methodology ensures that you have visibility through the discovery, design, implementation, and customization of your SharePoint portal.

Give us an opportunity to discuss your needs and let us show you how SharePoint can help your organization.
